Abstract of JP2003022621

PROBLEM TO BE SOLVED: To facilitate the updating of management information multiplexed in an AV stream.

SOLUTION: A method for recording data is 4 for recording, on a recording medium, a first unit (Record Unit) to store first data consisting of a video or a sound and second data to be reproduced by synchronizing with the first data, and management information (Movie fragment atom) to manage the first unit. The first unit and the management information are disposed closely to each other on the recording medium.
